Finger painting activity

Autumn finger painting

How to use this activity:

Engage your child in this delightful autumn fingerprint art activity by guiding them to use their finger to fill in the circles on the images with paint or ink.

Encourage them to identify and match the colours on the picture. This activity also presents a wonderful chance to explore colour mixing to achieve the desired hues and shades.

As your child develops more fine motor skills, consider introducing stamps or other tools for filling in the circles, although many children continue to enjoy the tactile experience of finger painting, so feel free to continue with it!
